**Eyes contact:** Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. Get medical attention if irritation develops or persists or if visual changes occur.

**Skin contact:** In case of contact, immediately wash with plenty of soap and water for at least 5 minutes. Cold water may be used. Get medical attention if irritation develops or persists. Remove contaminated clothing and shoes. Clean contaminated clothing and shoes before re-use.

**Inhalation:** If respiratory irritation or distress occurs, remove victim to fresh air. Get medical attention if respiratory irritation or distress continues.

**Ingestion:** If victim conscious and alert, give 2-3 glasses of water to drink **DO NOT INDUCE VOMITING**. Do not give anything by mouth to an unconscious person. Seek immediate medical attention. Do not leave victim unattended. Vomiting may occur spontaneously. To prevent aspiration of swallowed product, lay victim on side with head lower than waist. If vomiting occurs and the victim is conscious, give water to further dilute the chemical.

**Notes to physician:** No specific antidote, medical staff contacts Poisons Information Center. All treatments should be based on observed signs and symptoms of distress in the patient. **Suitable:** Use an extinguishing agent suitable for surrounding fire.

**Not suitable:** N/A

**Special exposure hazards:** Non-combustible.

**Hazardous thermal decomposition products:** Oxides of sodium and oxides of phosphorous.

**Special protective equipment for fire fighters:** Fire Fighting should wear positive self-contained breathing apparatus (SCBA) and full turnout gear.

**Remark:** Move containers from fire area if possible to do so without risk.

### Section 6: Accidental Release Measures

**Personal precautions:** Wear protective clothing. Ventilate area of spill.

**Environmental precautions:** Do not let this chemical enter the environment.

**Methods for cleaning up**

**Small spill:** Pick up and place in a suitable container for reclamation or disposal, using a method that does not generate dust.

**Large spill:** As for small spill

**Personal Protection in Case of Large Spill:** Safety glasses. Full suit. Dust respirator. Boots. Gloves. A self- contained breathing apparatus should be used to avoid inhalation of the product.

### Section 7: Handling and Storage

**Handling:** In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. Wear suitable protective clothing, gloves and eye/face protection

**Storage:** Keep containers tightly closed, in a dry, cool and well ventilated place.

\*\* nuisance dust - respirable particulate

\*\*\* total dust

#### Exposure controls

**Occupational exposure controls:** Use process enclosures, local exhaust ventilation, or others engineering controls to keep airborne levels below recommend exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

**Respiratory protection:** Dust respirator. Be sure to use an approved/certified or equivalent. Wear appropriate respirator when ventilation is inadequate.

**Hand protection:** Wear protective gloves to prevent skin exposure.

**Eye protection:** Wear protective safety glasses.

**Skin protection:** Wear appropriate long-sleeved clothing to minimize skin contact.

**Hygiene measures:** Keep away from foodstuffs and beverages. Do not eat, drink or smoke during work time. Remove soiled or soaked clothing immediately. Clean skin thoroughly after work; apply skin cream. During use, provide suitable ventilation.

**Environmental exposure controls:** Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

**Exposure Guidelines:** Exposure limits represent regulated or recommended worker breathing zone concentrations measured by validated sampling and analytical methods, meeting the regulatory requirements.
